▶ Actual Fire Accident

1. 2004 Naksan Temple (The oldest temple in Korea)

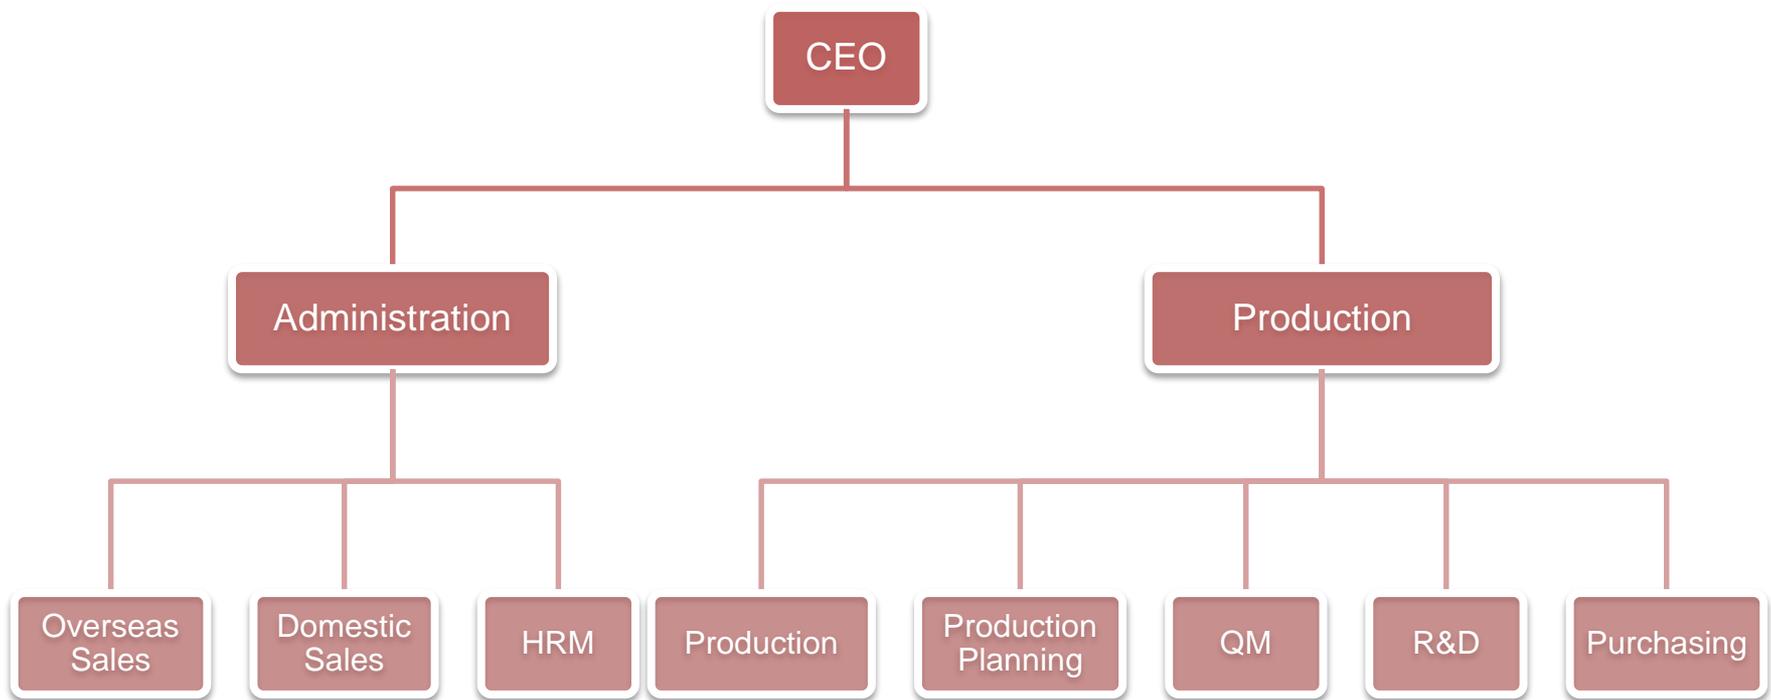

The fire was as big as bronze bell almost melting away and lasted about 4 hours but the valuables in safes have no damage, completely protected. All Buddhist scriptures can be readable.

2. In 2004, a fire burned down a large retail store in Korea

→ The safe protected all items including: a bank deposit book and Cash

Inspiring Professionalism

Sun Safes has been using the image of an eagle suggesting strong and secure products for over 40 years, and renewed the design in 2005. Sun Safes' spirit of professionalism goes beyond its dedication to exacting quality standards.

LuCell

Brand Philosophy

LUXURY

Unique Functionality

CELL

Re-thinking the concept of 'safes'

The word luxury refers to the safe itself. It is the first time that such design was applied to a safe. The word cell evokes the image of an individual and well protected space. It emphasizes the basic function of a safe.
